# Updated plots
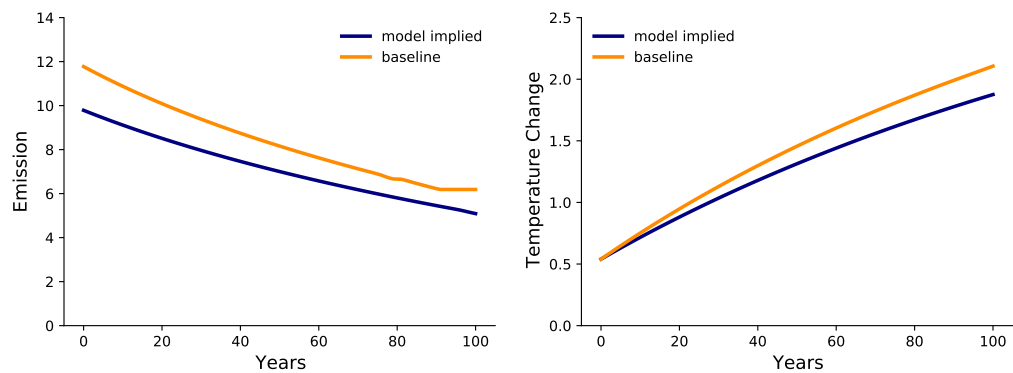

March 19, 2021

1 Parameter setting: $\xi_w = 1000$, $\xi_a = 1/10000$, $\xi_p = 1/20$, three damages ($.45$, $.45$, $.1$ baseline probabilities)
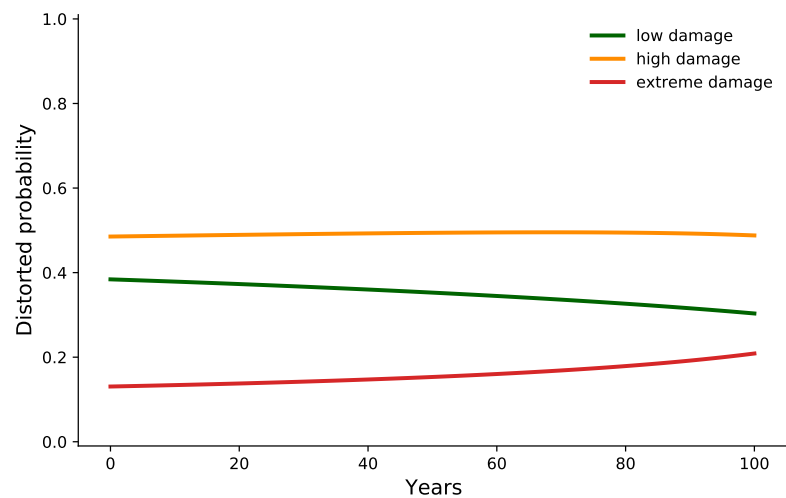

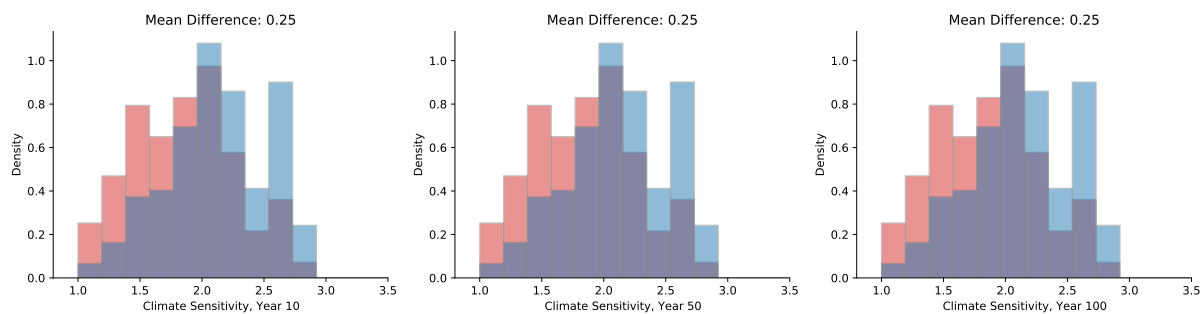

1.1 Value function
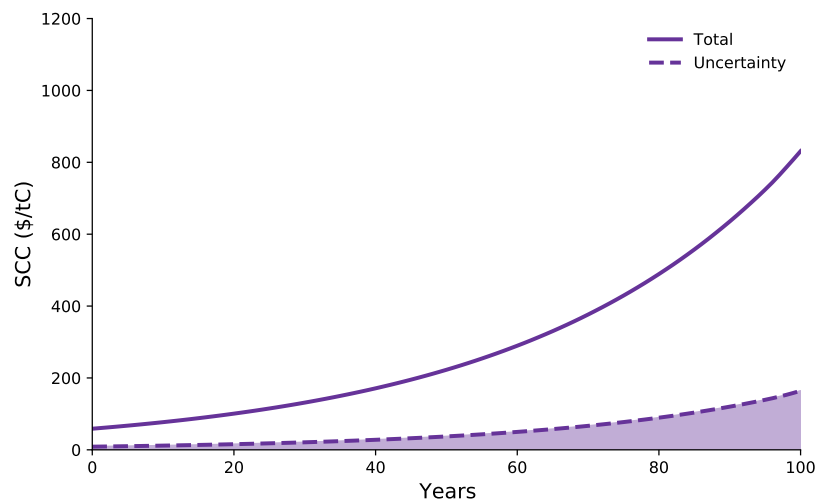

1.2 Emission and temperature change

1.3 Implied probabilities for damage function

1.4 Histograms for climate sensitivities

1.5 Social cost of carbon

1.6   Uncertainty Decomposition
