# Updated plots
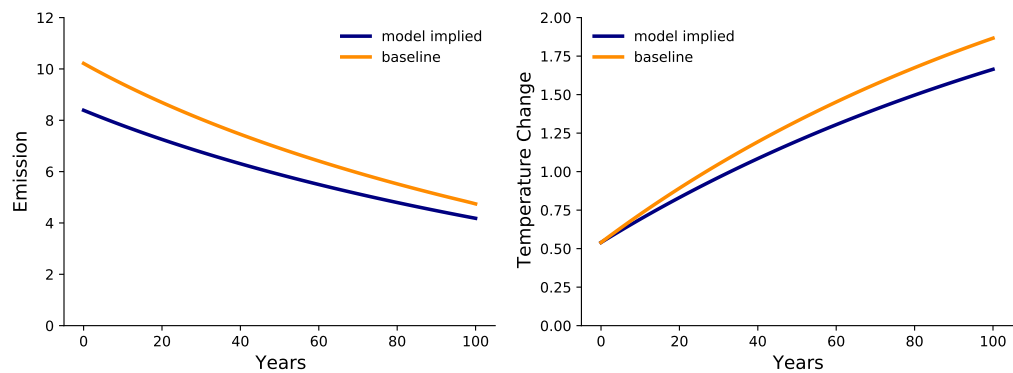

March 19, 2021

1 Parameter setting: $\xi_w = 1000$, $\xi_a = 1/10000$, $\xi_p = 1/20$, three damages ($1/3$, $1/3$, $1/3$ baseline probabilities)
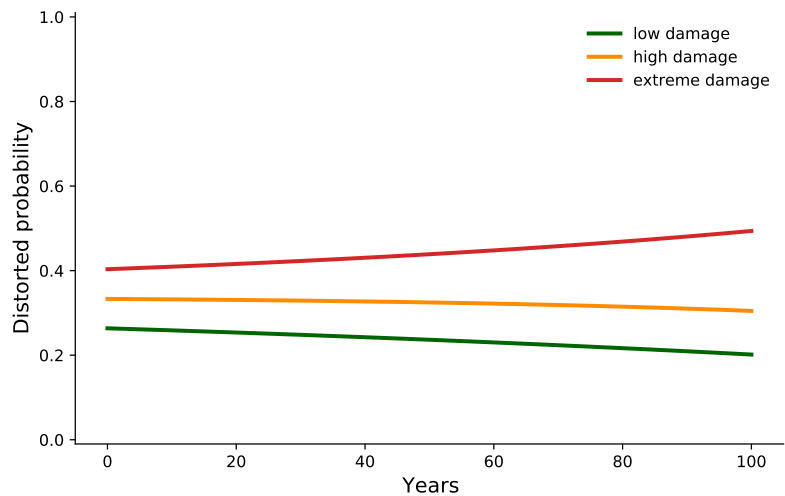

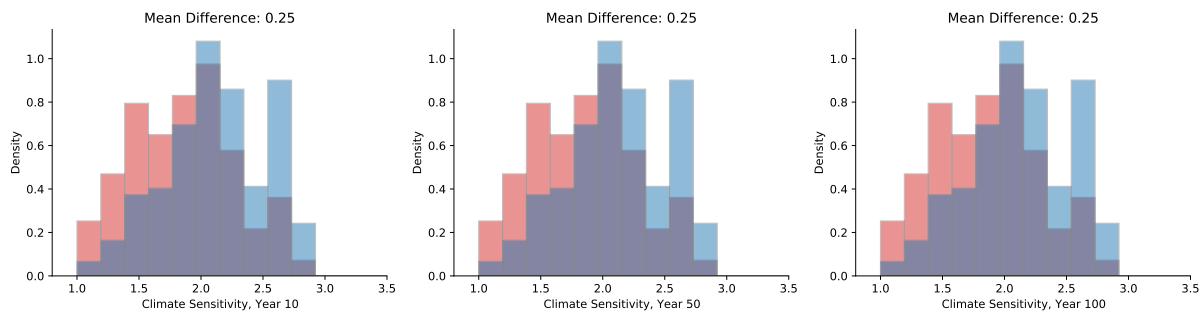

1.1 Value function

1.2 Emission and temperature change

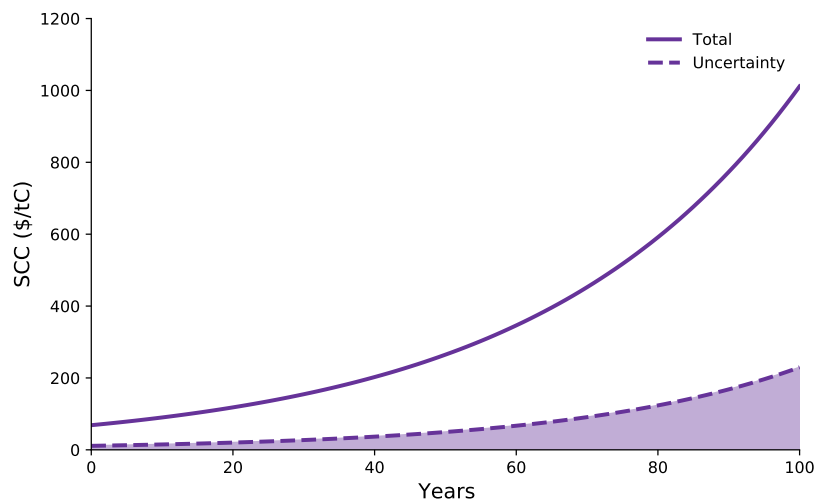

1.3 Implied probabilities for damage function

1.4 Histograms for climate sensitivities

1.5 Social cost of carbon

1.6 Uncertainty Decomposition
